A Summary
of
Statistics relating to agricultural production, stocks,
utilization, marketing, prices, and related data now
collected by the

U.S. AGRICULTURAL MARKETING SERVICE

with

Notes on statistical information relating to the agricul-
tural industry not now collected.

NOTE: Includes certain statistics of stocks of agri-
cultural commodities and quantities processed now
collected by the Department of Commerce. Agricul-
tural statistics available in the decennial and
quinquennial census of agriculture and the biennial
census of manufactures are not included in this
summary.

Washington, D.C.
September 1941

FOREWORD

The Agricultural Marketing Service, through its Washington office and through more than 300 field offices scattered throughout the country, collects basic information on the production, distribution, and utilization of agricultural food and fiber crops; conducts the current market reporting service; supervises the standardization and inspection of farm products, and administers a number of regulatory laws having to do with fair marketing practices.

Designated as a national defense agency, this Service has essentially the same organizational set-up as that which functioned during the World War to obtain Nation-wide information on available supplies, their location, and other pertinent data. The existing organization may readily be expanded again to meet the ever-growing needs of the National Defense Program. The Service is working closely at the present time with the organizations set up by the President to direct national defense activities.

The crop and livestock reporting service and the reports issued by that agency are essentially of the same character as those which were greatly expanded 25 years ago, under war emergency conditions. Of particular assistance during the present emergency is current information on available and prospective supplies, including their geographic location, together with compilations on production, carry-over, total annual supplies, distribution, and utilization.

Through the market news service, day-to-day reports on supply and demand conditions at important markets the country over are disseminated for more than 100 farm products. This service covers movement, market supplies, quality, and prices of livestock, meats, wool, fruits, vegetables, dairy and poultry products, grains, hay, seeds, and feedstuffs.

The standardization and inspection service was inaugurated during the 1914-16 period as a war measure, and has expanded considerably since that time, with official standards being used to a considerable extent today in the purchase of supplies for the military forces.

Through the administration of various regulatory statutes, the Service does much to eliminate abuses and unfair practices in the marketing of farm products.

The Agricultural Marketing Service again stands ready to do its part in furnishing the additional information and services relating to agriculture needed to coordinate effectively the agricultural phases of the National Defense Program.

Fruits and Nuts

Monthly forecasts of production, by States, of apples (for commercial areas) apricots, cherries (12 States), cranberries, grapes, grapefruit, lemons, oranges, peaches, pears, plums (3 States), prunes (4 States), strawberries, almonds, filberts, pecans, and walnuts.	: : Annual pack statistics for frozen fruits. :
Annual production estimates in December of 25 crops, including the 17 listed above, and avocados, figs, limes, olives, persimmons, pineapples.	: : Annual estimate of fresh tonnage of strawberries processed to be made at close of packing season. :
Varietal segregations, by States of monthly and annual estimates as follows: sour and sweet cherries in 12 States; wine, raisin, and table grapes in California; seedless and "other" grapefruit in Florida; early and midseason and Valencia oranges in Florida; Navel and Valencia oranges in California; clingstone and freestone peaches in California; Bartlett and "other" pears in Washington, Oregon and California; improved and seedling pecans in 12 States.	: : Annual statistics on production of dried apples, peaches, apricots, and pears. : : Quarterly reports on stocks of dried fruits (apples, apricots, peaches, prunes, and raisins). :
Prune forecasts in Wash. and Ore. are segregated to show probable production (fresh basis) in the Eastern and Western parts of the States separately. In Oct. the total crop in each State is broken down to show quantities canned, dried, and used fresh.	: : Estimates of production of tung oil nuts in Fla., Ga., Ala., Miss., La., and Texas. :
Farm disposition estimates, showing sales, quantities used on farms where produced, and economic abandonment, are made annually for each of these crops on a State basis.	: : Quarterly stocks of pecans in hands of dealers. :
Monthly cold storage holdings are reported for apples, pears, and frozen fruits. Apple holdings are reported for each important variety.	: : Forecasts and estimates of the total apple crop to supplement the present commercial estimates. :
Monthly and season average prices received by farmers for important kinds of fruits and nuts.	: : Total apple production can be estimated at no additional cost if the present law prohibiting these estimates is amended. : : More detailed disposition estimates for apples, peaches, pears, cherries, and strawberries showing quantities processed in various ways as well as fresh sales, farm consumption, unharvested, wasted, and grade-out. : : More adequate coverage of crop movement by truck. :

pimientoes, spinach, and tomatoes.) :

Opening and going prices paid to
growers of vegetable crops

Commercial Vegetables and Truck Crops

Cont'd

Annual estimates of harvested acreage, production, and average price, of processed crops -- published in December.	: County and area estimates for each State.
January 1 stocks of cabbage, onions in hands of growers and dealers, by States. Also Nov. 1 stocks of pickles in tanks and barrels. (U.S.)	: Adequate price data on monthly sales by growers.
Semi-monthly truck crop news reports on growing conditions, progress of crops, harvesting and shipping dates, varietal information, and probable rate of flow to market from various competing areas.	: Average loadings per car, and net weight of vegetable containers.
Special "flash" reports on sudden damage from freezes, storms, etc.	: More complete coverage on all truck crops in commercial areas.
Daily information on volume shipped to market by motor truck.	: Estimates of "quick frozen" production and complete coverage of canned asparagus and spinach.
Receipt of fruits by motor truck in 13 additional markets.	: More adequate coverage of crop movement by truck.

Potatoes and Sweetpotatoes

Pre-season estimates of acreage that growers intend to plant for harvest, by States.	: Separation of early acreage and production (for summer marketing) from the total crop in the 30 late potato States.
July estimates of acreage for harvest, by States.	: January 1 stocks and utilization of sweetpotatoes similar to the report on potatoes, in each of the 22 States.
Monthly forecasts of production of commercial early potatoes, by seasonal groups and States.	: A supplementary report on stocks of potatoes, probably in March.
Annual estimate of planted and harvested acreages, and production, by States, in December.	
January 1 estimate of the utilization of the potato crop to that date and stocks of merchantable potatoes in growers' and local dealers' hands, by States, in the 37 late and intermediate States.	

Potatoes and Sweetpotatoes
Cont'd

Monthly forecasts of production of all potatoes :
and sweetpotatoes, July through November. :
:
Annual estimate (after crops are marketed) of :
farm disposition showing (1) shrinkage and fed :
to livestock, (2) used in farm household, (3) :
saved for seed, and (4) total sales. :

Grass and Clover Seeds

Cont'd

Movement and prices (showing percentages sold by growers and prices received) of most of the aforementioned seeds in important producing sections.	:	Obtain information regarding stocks on January 1 held by seedsmen for the same kinds of seeds as are now covered by the carry-over survey in June.
Monthly and season average prices received by farmers, as above.	:	Estimate of the quantity produced of each leading kind or variety of millet and <u>sorgo</u> seeds in the production forecasts for these seeds.
Stocks in January and shipments (already made and prospective) of country shippers of alfalfa, alsike clover, red clover, sweetclover, timothy, millet, sorgo, sudan grass, cowpeas, and soybeans.	:	
Carry-over of 23 kinds of seeds by seedsmen and important country shippers on June 30 for the current and preceding year. These seeds are:	:	
Alfalfa, alsike, crimson, red, sweet and white clover, Korean, kobe, and other lespedeza, hairy vetch, Austrian winter peas, timothy, redtop, Kentucky bluegrass, orchard grass, meadow fescue, bentgrass, brome grass, crested wheatgrass, ryegrass, sudan grass, sorgo, and millet	:	
<u>Prospective and actual sales</u> of 17 kinds of field seeds by retail seed dealers. These seeds are:	:	
Alfalfa	:	Ryegrass
Red clover	:	Sudan grass
Alsike clover	:	Lawn grass mixtures
Sweetclover	:	Millet
Lespedeza	:	Sorgo
Timothy	:	Cowpeas
Redtop	:	Soybeans
Kentucky bluegrass	:	Seed corn
Orchard grass	:	
Disposition (percentages of the past year's crop held by growers for sowing on their own farms and of sales each to other farmers and to dealers) of 6 important kinds of field seeds: alfalfa, alsike, clover, red clover, sweetclover, lespedeza, and timothy seed.	:	

Vegetable Seeds

Preliminary acreage and production figures for the past year and projected or intended acreage and prospective production during the current year.	:	An in-between condition or other kind of report which would bridge the gap between the July 1 and December 1 (or November 1) surveys. Such reports would be very valuable when extremely unfavorable weather or other conditions arose as occurred in the late winter and spring of 1940-41 in California.
Final acreage and production figures for the past year, preliminary acreage and production figures for the current year, and carry-over on June 30 of the current and preceding year.	:	

All Hay

Acreage - Prospective for harvest, March (all tame)	:	Stocks on farms - quarterly
Acreage for harvest, July (all tame, alfalfa, clover, timothy)	:	Stocks in dealers' hands - (annually)
Acreage harvested, December (all tame, alfalfa, clover- timothy, sweet clover, lespedeza, grain, soybean, cowpea, peanut vine, miscellaneous tame and wild)	:	
Forecasts of production - monthly during growing season, by kind, all tame, alfalfa, clover-timothy, and wild.	:	
Annual estimates of production (all tame, by kind; alfalfa, clover-timothy, sweet clover, lespedeza, grain, soybean, cowpea, peanut vine, miscellaneous tame, and wild)	:

Monthly Carlot shipments of Eggs from
California, Washington, Oregon, Idaho,
and Utah.

Wholesale price reports are needed in about a dozen additional large city markets for the information of producers tributary to such cities.

Weekly market receipts of poultry and eggs at primary packing plants in Central States and of eggs only in California, Oregon, Wash., Idaho, and Utah.

Daily market receipts, storage holdings,
and wholesale prices of poultry and eggs,
at principal terminal (consuming) markets.

Dealers floor stocks of eggs, weekly at
New York City, Chicago, Boston, and:
Philadelphia.

Team track stocks of eggs at Chicago.

Daily Turkey Market Report (marketing season only) gives prices paid in producing regions and at terminal markets, also car passings of Okla. and Texas turkeys.

Livestock

<u>Farm Production and Income from Meat Animals</u>	:	Monthly or quarterly non-inspected
Includes for cattle, hogs, and sheep estimates by States as follows: Numbers on hand at the beginning and end of the year, inshipments, outshipments, young animals born or saved, local and farm slaughter and deaths; net production in pounds during the year, yearly average price per pound, cash and gross income and cost of inshipments.	:	wholesale slaughter to give total wholesale slaughter.
	:	Quarterly or annual retail slaughter.
	:	Only limited current information is available on non-inspected wholesale slaughter. Census of Manufactures publishes figures on total wholesale slaughter every other year.
<u>Number and Value of Livestock on Farms</u>	:	
Includes for each State estimated number, value per head and total value of horses, mules, cattle, milk cows, sheep, hogs, chickens and turkeys on farms January 1. Estimates by States are also shown for heifers 1 - 2 years old and heifer calves kept for milk cows. Records by States for January 1 are also available upon request showing separation of the numbers of each species of livestock into significant age/or sex classifications.	:	
<u>Spring and Fall Pig Crops</u>	:	
Includes for each State the estimated number of sows farrowed, pigs per litter, and total pigs saved in the spring season and also for the fall season. Forecasts are made in December of the number of sows to farrow the following spring and in June, the number of sows to farrow in the fall.	:	
<u>Lamb Crop</u>	:	
Shows for each State the estimated number of ewes 1 year old and over on January 1, lambs saved per 100 ewes, and total lamb crop.	:	
<u>Cattle Feeding Situation Reports</u>	:	
Include statements as to developments in the feeding situation which point to probable changes from the preceding year in the number of cattle to be fed for market--issued in October, November and December.	:	

Livestock
Cont'd

Cattle on Feed

Shows for each of 11 Corn Belt States the percentage change from the preceding year in the number of cattle on grain feed for market--reports as of January 1, April 1, and August 1.

Lamb Feeding Situation Reports

Includes statements as to developments in the feeding situation which point to probable changes from the preceding year in the number of sheep and lambs to be fed--issued in October, November, and December.

Sheep on Feed January 1

Includes estimated number on feed in each State.

Condition of Ranges, Cattle and Sheep

Issued about 10th of each month. Shows for each of the 17 Western Range States, condition of ranges, cattle and sheep. Separate comments cover conditions in each of these States.

Inshipments of stocker and feeder cattle
and sheep

Includes State Veterinarian records of inshipments to 7 Corn Belt States from stockyards and direct receipts by State of origin.

Livestock, Meats, & Wool Market Reviews
and Statistics

Issued weekly. Contains current market reviews and weekly average market prices, by classes and grades, also receipts, shipments, and slaughter of livestock at principal markets; inspected slaughter at 27 points and monthly at all points by selected stations and by regions; cold storage holdings; imports and exports of livestock, meat and wool; production and consumption data; wholesale and retail meat prices and values at New York; meat graded by A.M.S.

Monthly and annual average prices received by farmers per 100 pounds for principal classes of livestock: (hogs, beef cattle, veal calves, sheep and lambs.)

Market information on direct packer purchases of livestock, dressed meats sold at wholesale, retail meats, and wool sold direct by producers for numerous important producing areas and distributing and consuming centers not included in current reports.

DATA NOT PUBLISHED BUT AVAILABLE

Shipments of Livestock

Records of monthly shipments of livestock to stockyards and packing plants from each State.

Records of monthly railroad shipments of livestock to and from certain States.

State Veterinarian or Sanitary Board records of inspections of livestock moving into and out of certain States.

Wool and Mohair

Farm Production and Income from Wool

Shows for each State estimated number of sheep shorn, weight per fleece, total wool production, price per pound, and cash income. In addition, there is shown the estimated production of pulled wool for the United States. Preliminary report on farm production issued in August. -- Final report in March following year.

Stocks in hands of growers and local dealers in native sheep States not available. Such stocks are probably significant in some years and are needed to complete the stocks picture.

Farm Production and Income from Mohair

Includes for the 7 leading mohair producing States the number of goats clipped, average clip per goat, total mohair production, price per pound, and cash income.

Quarterly Stocks -- Dealers and Manufacturers

Stocks of wool in hands of dealers and manufacturers are collected by Census Bureau.

Stocks -- Growers and Local Warehouses

These stocks cover 13 Western sheep States as of December 31 and March 31, collected by the Agricultural Marketing Service and furnished to Census Bureau.

Monthly and annual average prices received by farmers for wool.
